The slogan of IFC Markets stems from the main goal to be a partner rather than just a broker for its clients. The company vision is to bring online trading to a completely new level by offering flexible trading conditions, innovative approaches to trading and analysis. Our clients know what we prioritize and what we are working for – provide professional trading platforms and all the necessary resources to trade and analyze easily.

Regulation

We are licensed by:

British Virgin Islands Financial Services Commission
(BVI FSC) - Certificate No. SIBA/L/14/1073.

Cyprus Securities and Exchange Commission.
CySEC license number 147/11

Advantages

Insured funds

The company holds Professional Indemnity Insurance with AIG EUROPE LIMITED.

DMA / STP business model

Our business model is built on transparent relations with our clients. We aggregate quotations from the leading banks and liquidity providers and generate streams of quotations for our clients from the best prices.

Continuous Futures CFDs

We offer continuous Commodity and Index CFDs, which are calculated continuously without expiration dates on the basis of the nearest liquid futures by unique algorithm. Upon occurrence of the expiration date of the current base future the price of our continuous CFD does not make any gaps or sharp movements.

Advantages

Unique opportunity to create own trading instruments (PCI)

Innovative technology Personal Composite Instrument (PCI) allows you to realize your trading ideas in terms of creating your own instruments, make technical analysis and trade them.

One of the most competitive Partnership Programs

We have worked out a special Partnership Program with exceptional conditions that will enable partners to launch their own profitable businesses.

Best Swaps – Position rollover at interbank rates

We use interbank rates, which reflect live streaming terms of borrowing. We provide preferential swaps for non-currency instruments and zero swaps for Islamic accounts.

NetTradeX Trading Terminal

NetTradeX
Trading analytical platforms

NetTradeX is an advanced trading – analytical software, developed by NetTradeX Corp., a member of IFCM Group. The development of the own trading station is one of our company's honors. The platform equipped with all the tools required for 21st century trading to set orders, manage accounts and analyze the markets. It is unique by the PCI technology, through which it is possible to create own instruments instead of choosing the available assets from the list. Additionally, beneficial trading conditions for the most popular trading assets, competitive prices and low spreads make the platform the most professional and powerful tool for trading.

Over 500 trading instruments and PCI

Instant execution

Personal Composite Instrument (PCI) technology

We aimed to create a totally new instrument, which would totally eliminate the limits of trading instruments. The PCI technology is based on GeWorko Method, which is similar to currency exchange rate, when the value of the base currency is expressed in units of the quoted one, but in this method the base and the quoted currencies are replaced by two combinations of assets or two portfolios. The sum of the values of all assets in each portfolio, taking into consideration weight coefficients, gives an absolute dollar-denominated value to it. The technology is available only on NetTradeX trading station.

MetaTrader 4 & 5 trading platform

MetaTrader 4

MetaTrader 5

MetaTrader 4 is the most popular platform among traders due to its professional functionality, good interface and available tools to trade and analyze the markets.

Over 500 trading instruments

Our Products

Currency pairs

We provide major, minor and exotic currency pairs. Under normal trading conditions. Spreads are fixed and start from 1.8 for EUR/USD and USD/JPY.

Precious metals

We provide gold, silver, platinum and palladium quoted against U.S. Dollar and Euro. The spreads are fixed.

CFDs

We provide the most popular CFDs on Indices, Stocks and Commodities. CFDs on Indices and Commodities are traded uninterruptedly, without an expiration date. In addition, we provide CFDs on commodity futures, traded with expiration dates.

Gold instruments

This group includes gold, quoted against Silver, Oil and S&P 500 Index.

ETFs

This group includes CFDs on shares of Exchange Traded Funds (ETFs), which are traded on the New York Stock Exchange (NYSE).

PCI

Our clients are free to create their own instruments. Additionally, we provide PCI library where they can find instruments, created by our analysts. The instruments are very diverse and include assets from various financial segments.

Everyday tools for traders
